

DAVID BOLIVAR

Backend & Implementation Engineer — Payments

Bogotá, Colombia · +57 320 454 9315 · cesar.bolivarc@hotmail.com · linkedin.com/in/davidbol094 · github.com/JabosCOL · Portfolio

PROFESSIONAL SUMMARY

Backend engineer implementing and supporting payment-provider integrations for cross-border payouts across APAC, LATAM and EMEA. I deliver integrations end to end — partner specification, configuration across development, sandbox and production, release — working with REST and SOAP processor APIs, webhook (IPN) flows with HMAC signature validation, and provider-to-internal state mapping.

TECHNICAL SKILLS

Payments — Payment-provider integration · payout flows · webhooks/IPN · HMAC and RSA signing · transactional flow analysis · state mapping · idempotency · settlement status

Languages — Java · SQL · Bash · TypeScript

Backend & Data — Spring Boot · Spring MVC · Hibernate/JPA · REST APIs · SOAP · MySQL · SQL for configuration, validation and troubleshooting

Platform — Docker · Kubernetes (AWS EKS) · GitHub Actions CI/CD · AWS (SQS, Parameter Store) · Git · Maven · automation · release promotion · environment configuration (dev/sandbox/prod)

Testing & Practices — JUnit · Mockito · MockServer · parameterized integration testing · incident diagnosis and root-cause analysis · technical documentation · code review · Scrum/Agile

PROFESSIONAL EXPERIENCE

Binance — Backend Developer, Payment Integrations

APR 2024 – PRESENT · BOGOTÁ, COLOMBIA

- Implement payment-provider integrations end to end across three regional payout services (APAC, LATAM, EMEA), including multi-flow providers with four processor flows per integration.
- Integrate with external processors over REST and SOAP, handling per-provider authentication, HMAC and RSA request signing, mTLS, and credentials resolved at runtime rather than hardcoded.
- Process asynchronous payout webhooks (IPN) from 40+ processors across 20+ countries, normalizing them with status polling into one payout state machine so duplicate or late notifications cannot pay twice.
- Diagnose incidents to root cause — including a signing-key investigation with no documentation or ticket history — producing a documented conclusion that unblocked the next integration.
- Configure processor routing, bank-code mappings and funding accounts through operational SQL, and templated the onboarding scripts so each new provider follows a repeatable procedure.
- Automate local integration environments with Bash and Docker Compose, provisioning mocked AWS services and SQS queues so flows run end to end without a partner's sandbox.
- Cover integrations with JUnit, Mockito and MockServer using parameterized tests, and turn recurring review findings into repository-wide engineering conventions and scaffolding templates.
- Contribute to the customer-facing UI in React and Tailwind CSS, with forms in React Hook Form and Yup, tested with Vitest, React Testing Library and Playwright.

Universidad de los Andes — Backend Developer (Intern)

SEP 2021 – JUL 2022 · BOGOTÁ, COLOMBIA

- Developed and maintained backend features in JavaScript, PHP and Drupal CMS on MySQL, across the full cycle from analysis to documentation.
- Mentored junior team members on code quality standards and review practice, shortening ramp-up time for new contributors.

EDUCATION

Politécnico Grancolombiano — Bachelor's Degree, Computer Software Engineering

FEB 2025 – JUN 2027 (EXPECTED)

SENA — Higher National Diploma, Software Analysis & Development

JAN 2020 – JUL 2022

ILSC Education Group — General English Program

JUL 2023 – FEB 2024 · BRISBANE, AUSTRALIA

CERTIFICATIONS & ACHIEVEMENTS

SENASOFT — National Technology Competition · Oct 2021 — Fourth place nationally in the web development category; built a card game with a team under competition conditions.

Microsoft Official Course AZ-900: Azure Fundamentals · Oct 2021 — Eight-hour official course (Intelligent Training, Microsoft Gold Learning Partner).

LANGUAGES

Spanish — Native · **English** — Professional working proficiency (CEFR B2); eight-month immersion in Brisbane, Australia.
